

Challenges and areas for Debates

- Climate Environment Sustainability
- Children and future generations
- Matriarchy and Equality
- Central vs Local decisions and power
- Inclusion of People to vote
- Living conditions vs Environment
- Safety
- EU or not
- Nato or not
- National or Global Collaboration
- Increasing and older population
- Innovate and contribute
- Urban vs non-urban
- Level of Taxes
- Wealth vs poverty

Build it right from the start

Inclusive for All	Open Source
Respecting Diversity	Generic reusable and sharing approach
Complementing existing National State	Co-Creation key component
Direct + Liquid Democracy supporting levels of Advisory and Delegation	Blockchain - Global Earth IDs. Secure trusted and end the Corruption
Support Global and Local - Earth, National, Regional, Municipals and local Tribes of groups	
The most important data for Transparency needs to be truthful , correct and udated	
The level of statuses, progress and other KPIs and Health indicators metrics should be defined up front	

Why

Make any area great again	More Peaceful
Make Earth great again	More Humanistic
Structure for a Mars based society	More Balancing opposite forces
Include all citizens	
Build a co-creating future oriented mindset that involves people and individuals
